Miss Ferrell Complimented

Miss Beulah Ferrell was complimented Saturday evening when the members of the Appomattox Garden Club entertained for the bride-to-be in the home of Mr. and Mrs. Robert C. Hubbard. Decorations in keeping with the Yuletide season were used throughout the lower floor to add to the attractiveness of the party.

Miss Ferrell, a past president of the club, was presented a silver tray.

A unique program, in the form of "This Is Your Life," was arranged by Mrs. Hubbard for the entertainment for the evening.

Earlier in the week, the choir of Liberty Baptist Church feted Miss Ferrell and her fiance, Raymond F. Jamerson, at a dinner party at the Parkway Restaurant. The center piece was a huge Christmas arrangement in keeping with the musical theme.

Miss Ferrell was presented with a piece of silver.

For Wedding Party

Mr. and Mrs. Thelbert M. Trent will entertain the Ferrell-Jamerson wedding party Friday evening at a dinner party preceding the rehearsal. The party will be at Maude's Restaurant.

PAMPLIN, ROUTE ONE

Visiting in the home of Mr. and Mrs. Frank Webber over the week-end were Mr. and Mrs. Billy Webber, Mr. and Mrs. Samuel Webber and Mr. Leslie Webber, all of Pamplin.

Mr. and Mrs. Wade Berry and three children, of Richmond, and Mr. James Nelson, of Farmville were other guests.

'SAFETY FIRST' GOOD RULE IN HANDLING PESTICIDES

If you handle pesticides carelessly, you're asking for trouble, warns Dr. J. O. Rowell, entomologist at VPI Agricultural Extension Service.

He says the chemicals recommended for pest control should not be feared, but they should be respected. Most of the pesticides in common use are more or less toxic to all animal including man.

Some are extremely poisonous; others are only slightly toxic. They should all be handled, applied, and stored with care. They should be kept in a dry well-ventilated place away from direct heat or open flame. Be sure they are out of reach of children. The labels should be kept legible, and unlabeled cans should be emptied and discarded. Dispose of them in such a way as to prevent possible poisoning of children and pets.

Dr. Rowell says to:

Read all labels and directions on package, and follow instructions. Wear protective clothing, and respirator when necessary. Wash clothing after each wearing. Change clothing as soon as possible when pesticides are spilled on it. Bathe completely after extensive use of any pesticide. Call a doctor immediately if there are any symptoms of poisoning.

Do not breathe vapors, dust or spray mist. Do not eat or smoke until your hands and face have been thoroughly washed after using pesticides. Do not use pesticides for purposes other than recommended uses. Do not spill materials on the skin. Do not become careless while applying pesticides.

QUESTIONS OF THE WEEK

(Editor's note: Here are the questions asked most frequently by Virginia farmers during the past week, as reported by county agricultural agents. Staff members of the VPI Agricultural Extension Service and/or Experiment Station supply the answers.

Q. How long will the effects of granular heptachlor last in controlling the alfalfa weevil?

A. Only one entire season.

Q. Several barley stands show a yellow color toward the end of the plant blades. What is the probable cause?

A. Ordinarily this is the effect of frost and cold weather. However, this year many specimens being received in VPI plant disease laboratories are showing the effect of nutrient deficiencies. Better check your lime and fertilizer needs.

Q. What is the most effective and easiest way to control worms in pigs?

A. A piperazine and carbon disulfide combination is one of the best and easiest to use. Its higher cost, as compared to the older sodium flouride, is more than offset by the lack of toxicity and absence of weight loss during the worming period.

Q. What will fat cattle prices likely be in the spring?

A. Prices of all cattle are expected to average a little lower in 1959 than in 1958.

Q. What are some of the jobs I can do in my farm woods?

A. Thin dense young stands for pulpwood. Plant forest seedlings. Release good young trees now growing under inferior trees. Clear and plant where low-grade hardwoods now cover an area. Prepare seedbed before making a harvest curring where natural reseeding is expected.

Q. Is chlordane recommended for killing crab grass seed in lawns?,

A. It is not recommended in Virginia yet. Many confl... about its effectiveness ... received, and more resea... ed.
